

Ringwood Internet have worked with

Web Application and Software Development - 2014

We have 14 years experience in developing web applications and in recent years mobile applications

Our mass of experience covers **online ordering, automation of backend office processes** and **online booking systems**.

We also have **extensive experience** in the **property & real estate** sector.

Our in depth Google Adwords training and exam, as well as 14 years SEO & marketing and conversion optimization, have given us **strong sales and marketing skills**. These are useful to you when building your apps which may need to **generate additional revenue** with emphasis on sales conversions.

Low overheads & operational efficiency mean: — You Save More
& Get More

We're much better value than the large software houses & digital agencies, have the same skills, — and we're passionate about your project on a personal level

We are currently writing our latest apps as Rest APIs using Laravel for the backend and single

We're current testing **Google Glass** for their app potential. Check our blog entry soon.

— Nik Kerry Director,
Ringwood Internet Ltd

page apps with Angular for the front end. This means that the apps do not need to be completely rewritten for mobile devices.

We are **substantially cheaper than massive software houses** or and our engineering background give us an edge over digital agencies.

In addition to our porfolio below, we have accepted or collaborated on out sourced projects from other companies.
